EXAMINER'S AMENDMENT & STATEMENT OF REASONS FOR ALLOWANCE

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with applicant's representative, Dr. Daniel A. Geselowitz on 16 November 2005.
3. The application has been amended as follows:

Claim 1:

In line 6 after "gas injection section", insert "--having a bottom plate--".

In line 8 before "bottom plate", delete "a" and insert therefor "--the--".

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance: The closest prior art of record, CADY and OMSTEAD, fail to teach or reasonably suggest the claimed invention. Specifically, while OMSTEAD does teach a gas injection section having a bottom plate with openings and a baffle plate located inside the gas injection section, the teaching of OMSTEAD of using the baffle (deflector) plate to provide a "uniform process gas flow" across the wafer appears to teach away from applicant's

Art Unit: 1746

claimed invention which uses the baffle plate such that inert gas supplied at the outer peripheral portion of the wafer is larger than that at the center thereof. Accordingly, OMSTEAD appears to teach away from the combination with CADY to achieve applicant's claimed invention. For at least the foregoing reasons, applicant's claimed invention appears to be allowable over the prior art of record.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph L. Perrin, PhD whose telephone number is (571)272-1305. The examiner can normally be reached on M-F 7:00-4:30, except alternate Fridays.

7. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael E. Barr can be reached on (571)272-1414. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
